Environmental Considerations in Planning: New Momentum
Environment Pre-Conference Workshop
TRB MPOs Present and Future Conference
August 27, 2006

Chester Fung
FHWA Office of Planning

Our Ideal Goal!

‘Momentum’ is building to encourage better linkages between transportation planning and NEPA
Examples of building momentum for today’s talk:

- Planning and Environment Linkage concepts

Momentum is building:

- Relevant SAFETEA-LU Section 6001 requirements
- FHWA initiatives

Planning and Environment Linkages: An Integrated, Systems Perspective

Integrated Approach
opportunities to support multiple community goals and improve quality of life
Stronger Linkages: Connecting Decision Processes

**Transportation Systems Planning & Programming**
- Project locations
- Conceptual design

**Transportation Project Development**
- Environmental analysis and permitting
- Right-of-way
- Engineering design

**Resource Planning Processes**
- Land use
- Watershed
- Habitat
- Cultural resources

**Resource Project-Level Decisions**
- Water and wetland permitting
- Endangered Species consultations
- Historic Preservation process
- Development permitting

What Is Entailed? Some Examples

- Data and analysis tools
- Inter-agency coordination
- Decision process opportunities
Data and Analysis Tools

- Geographic natural and cultural resource information for overlays and analysis in the planning process

Inter-Agency Coordination

- Engaging the agencies that will be involved in environmental analysis and permitting
- Documenting the planning process for resource agencies and other stakeholders
- Identifying appropriate ways for other agencies to be involved
- Memoranda of Understanding/Agreement to establish interactions, points of concurrence
Decision Process Opportunities

- Creating ‘hand-off’ documents in planning that will be useful in project development
  - Purpose and need
  - Alternatives
  - Indirect and cumulative impacts
  - Mitigation opportunities
- Tiering of environmental analysis
- Design guidelines sensitive to environmental and/or social context of facilities

SAFETEA-LU Implications for Transportation Plans

- Some of these practices are now required
- Related Provisions: Section 6001
  - Consideration of environmental mitigation
  - Consultation with resource agencies
  - Consideration of resource maps and inventories
  - Participation Plans for input, including visualization techniques
SAFETEA-LU: Mitigation

- Mitigation Activities: In Long-Range Plans, discussion of
  - Types of potential environmental mitigation activities and potential areas to carry out activities
  - “…including activities that may have the greatest potential to restore and maintain the environmental functions affected by the plan”
  - Developed in consultation with Federal, State, and tribal wildlife, land management, and regulatory agencies

SAFETEA-LU: Consultation

- “MPOs shall consult, as appropriate, with State and local agencies responsible for land use management, natural resources, environmental protection, conservation, and historic preservation”
- Consultation shall involve, as appropriate:
  - Comparison of transportation plans with State conservation plans or maps
  - Comparison of transportation plans to inventories of natural or historic resources
SAFETEA-LU: Participation Plans

- Participation plan to be developed in consultation with all interested parties
- Reasonable opportunities to comment on contents of transportation plan
- Methods, to maximum extent practicable:
  - Accessible public meetings
  - Visualization techniques
  - Information electronically accessible, such as World Wide Web

You can do it! We can help…
FHWA Initiatives

- Training and peer exchange events
  - Linking Planning and NEPA Workshops
  - Conservation and Transportation Planning Workshops
  - GIS Training
- Rules and guidance
  - Planning Notice of Proposed Rulemaking
  - Linking Planning & NEPA Guidance
  - NEPA Indirect & Cumulative Impacts
FHWA Initiatives (cont’d)

- Information resources
  - Planning and Environment Linkages website
  - Eco-Logical report
  - EO 13274 – Integrated Planning Work Group
  - Context Sensitive Solutions website
  - Scenario Planning website
  - Visualization website
  - Exemplary Ecosystems case studies

Everything Is Connected

Linking planning and NEPA ideas are related to previous and ongoing efforts
New FHWA Website on Planning and Environment Linkages

- Overview of approach and concepts
- Tips on identifying activities to implement approach
- Descriptions of effective practices
- Links to other related information resources
- Related guidance, regulations, and SAFETEA-LU provisions

Help us build the knowledge base! Send comments, info to:
Chester Fung, chester.fung@dot.gov
or Micheal Culp, michael.culp@dot.gov

In Summary

- Goal: stronger linkages between planning and Environment
- Supported by SAFETEA-LU, rules, and guidance
- There are information resources available from FHWA and others to help
